

StartPage

What is StartPage?

A startpage is the page you first see when you open your browser or open a new tab (sometimes homepage). This is a custom startpage template for links of favourite sites.

Features

- Themes

It has two themes: Green and Gray You can check them here: **Demo**

(<https://mlvnt.github.io/StartPage/>)

It looks like this:

And it's responsive:

- Integrated Search

By typing comand + "what you want to search" in the search bar you can search directly in several sites. If you want to view the list of available comandas on the StartPage simply type ? in the search bar. If you don't use any of this comandas the query you type is going to be processed by the default search engine – Google.

Comand	Corresponding Sites
?	HELP
a:	AMAZON
d:	GOOGLE DRIVE
G:	FACEBOOK
g:	GITHUB
i:	INSTAGRAM
m:	MYANIMELIST

Comand	Corresponding Sites
r:	REDDIT
t:	TWITTER
tw:	TWITCH
w:	WIKIPEDIA
y:	YOUTUBE

- Link Local Files

How to install?

Go to your browser's homepage settings and replace the current homepage with the directory on your local machine in which your StartPage is stored.

OR

Install the Chrome extention New Tab Redirect to replace the new tab with StartPage.

Future Iterations

This is what a I plan to include:

1. Notes
2. Icons
3. Weather
4. Clean Code
5. More Themes
6. Minified CSS, HTML & JS
7. Calendar
8. Thor sites list
9. Favicon
10. Bug Report section

Projects that I used

1. Frontpage by Jasius (<https://github.com/Jasius/Frontpage>)
2. primetoxinz.github.io by primetoxinz (<https://github.com/primetoxinz/primetoxinz.github.io>)
3. Tilde by cadejscroggins (<https://github.com/cadejscroggins/tilde>)
